DETAILED ACTION

Drawings

1. The drawings are objected to because the drawings are informal in format. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-36 are allowable over the prior art of record.

3. The following is an examiner's statement of reasons for allowance:

As per independent claims 1, 7, 18, 29, the claim limitations pertaining to applying a plurality of confidence levels in conjunction with marking each portion of the output with the confidence levels, in conjunction with the claimed features of reviewing the documents, are not explicitly taught by the prior art of record.

With respect to the prior art of record, Kahn et al (6122614) teaches a text transcription system with speech recognition (speech input converted to text) comprising (Kahn et al (6122614), col. 1 lines 1-10, col. 2 lines 15-25) word extraction allowing the user/operator to review the comparison (col. 2 line 40-55). Kahn et al (6122614) also teaches allowing the user to edit/review the selections during a training phase of the system, including storing information about the user/reviewer (Kahn et al (6122614), col. 3 lines 9-25; col. 6 line 56 – col. 7 line 20; col. 7 lines 45-55; col. 8 lines 2-28). However, Kahn et al (6122614) does not explicitly teach the limitation “marking each portion of the document according to a corresponding one of the plurality of confidence levels”. Since Kahn only teaches a single possibility for the unmatched word, there are no different degrees of possibilities, or confidence, and as such, also does not teach marking each portion of the document according to one of the plurality of confidence levels. Furthermore, it would not have been obvious to one of ordinary skill in the art of transcription services to modify the teachings of the prior art of record to obtain the recited claim limitations of the independent claims as noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
